

Deliverables:

- Single landing page optimized mobile and web view
- User-optimized mobile and web view
- Admin panel optimized in mobile and web view

Third-Party services:

- Domain (Godaddy Provider)
- Server (Digital ocean provider)
- SMS integration

Technologies:

- HTML
- CSS
- BS5
- PHP Laravel 10

Deployment:

- The digital ocean server will deploy the admin portal, user portal, and landing page.

Admin Panel

Admin Login

As an admin, I want to be able to log in to my account using an admin login page, so that I can access my account and the platform's features and services

Page Requirement:

- Email
- Password
- Login button
- Forgot password

Condition:

- When the admin clicks forgot password redirects to the forgot password page.

Admin Forgot Password

As an admin, I want to be able to reset my password if I forget it, so that I can regain access to my account and secure my account information.

Page Requirement:

- Email
- Submit button

Page Requirement for resetting new password on next page:

- Enter OTP
- New password
- Confirm new password
- Submit Button

Conditions:

1. When an admin clicks the submit button the system will validate the email. If the validation is successful, the system will send 6-character random lowercase alphanumeric OTPs to the registered mail.
2. Password contains Min 8 characters, at least a lowercase (a-z), at least an uppercase (A-Z), at least a number (0-9), at least a special character.
3. Once the admin submits a new password, all active devices will log out and the link will redirect to the login page with a success message.

Admin Logout

As an admin, I want to log out of my account with a simple and secure logout functionality, so that I can securely end my session and protect my account from unauthorized access.

Condition:

1. When the admin clicks the logout button from all active devices, the session will logout.

ADMIN RESET PASSWORD

As an admin, if I change a new password, I want to be able to reset my password easily and securely, so that I can regain access to my account and continue using the platform.

Page Requirement:

- Old password
- New password
- Confirm password
- Set new password button

Conditions:

- Need to validate the admin's old password from the database.
- After admin will enter a new password.
- Password contains Min 8 characters, at least a lowercase (a-z), at least an uppercase (A-Z), at least a number (0-9), at least a special character.
- Once the admin resets the password, if there is any device login, it also wants to logout automatically.
- The new password will be saved in an encrypted format.

Dashboard

Page Requirement

- Total PV
- Total Left business
- Total right business
- Total Left users
- Total right users
- Total Direct Referrals
- Total retail profit
